

Technology Transfer at NASA

NASA's Technology Transfer program is focused on bringing Space-Age technology into industry. Through our patent licensing program, some of these same NASA-proven technologies are available to you to solve your technical challenges, or form the foundation for a new product or even launch a new company.

Make NASA Tech Work for you

Step One:

Think about your business and the biggest challenges that you have.

Step Two:

Navigate to:
technology.nasa.gov/patents/ksc

Step Three:

Browse or search the catalog by key word or category.

Step Four:

Choose the technology or technologies that fit your business needs.

Step Five:

Press the **Apply Now to License This Technology** button and follow the instructions.

Step Six:

Enjoy the benefits of NASA technology.

Spinoff

NASA's Spinoff is an annual publication that highlights the technologies from NASA's aerospace program that have made their way into other industries and are benefiting life on Earth.

Spinoff showcases the success stories of NASA's Technology Transfer program, demonstrating the depth and versatility of the technology being developed for the space program.
